Statistical Decision Sciences: The Art of Managing Uncertainties

《講統計、談精算》系列
STATalk.ASpeak Series

Imagine you're a
confident young
trader riding high
on your recent wins.

This morning,
just hours before
executing your
largest \$10 million
trade, you receive
a positive COVID
test result.

Your mind races:
"Oh my God, double
lines... did I really get it?"

Then comes the twist
— your client insists
you bet the full \$10
million in one single
move.

Now the real dilemma
hits: Do you follow the
order, or push back?
