Data Science in Action

Making Official Statistics the 'Smart' Way at C&SD

Mr. Jason NG

Statistician, Census & Statistics Dept, HK Government

30 APR 2026 (Thu) 5-6pm

T4, 1/F, Meng Wah Complex, HKU

How is Data Science applied in the production of Hong Kong's official statistics?

At the Census and Statistics Department (C&SD), we are gradually integrating data science and AI into our workflows. This session offers a practical look at how we are leveraging technology to enhance efficiency, streamline routine tasks and enhance our statistical service.

Join Jason Ng, Statistician and Data Science Team Lead, to share his experiences on C&SD's digital journey and how data science is applied across the government.

What you will discover:

1 *Data Science in Practice:*
Explore how data science is being implemented to complement traditional statistical methods and improve operational efficiency.

2 *Driving 'Smart' Government:*
Understand how digital transformation within C&SD helps optimise resources, and how the team collaborates with other government bureaux on their data initiatives.

3 *Career Opportunities:*
Get information on the career opportunities available in C&SD

Register before April 30, 2026

About the speaker

Jason has been with the Census and Statistics Department for around four years. As a Team Lead in the Data Science Section, he drives the department's digital transformation by spearheading various data science / AI initiatives. Passionate about tech education, he also serves as an internal Data Science / AI trainer to build technical capacity among his colleagues. Prior to his role in the government, Jason worked as a Manager in the Data & Analytics team at a multinational bank, giving him a unique perspective on data science in both the private and public sectors.
