Postdoctoral Position

A postdoctoral position and a research assistant position are currently available in the Department of Statistics and Actuarial Science at the University of Hong Kong (ranked the 22nd worldwide top universities by QS in 2020).

- Candidates must have a Ph.D. in computer science, data science, statistics or related fields.

- Research projects involve deep learning, graph neural networks, recommendation systems, etc. Successful applicants will collaborate with TCL AI scientists and have extensive hand-on experiences with real data and real applications from TCL.

- Applicants should have significant experience with computer programming (for example, Python, C/C++), and be familiar with deep learning, e.g., PyTorch, TensorFlow etc.

- Applicants with publications in top AI or machine learning conferences are preferred.

For those who are interested in the positions, please email your c.v. to the PI, Professor Guosheng Yin, gyin[at]hku.hk; for PI's publication, visit https://web.hku.hk/~gyin/materials/pub.pdf
