#### **Top Low Stress Jobs That Pay Well in 2021** (GoBankingRates)

https://www.gobankingrates.com/money/jobs/high-paying-careers-wont-kill/#6

#### 1. University Professor

Median Salary: \$80,790

Post-secondary teachers tend to enjoy flexible schedules. While some teach classes at night or on weekends, these professionals generally find their jobs rewarding and appreciate the opportunity to share their expertise with students, according to the BLS. CareerCast ranked university professor as one of the careers with the lowest stress level in 2019, the most recent year the job website compiled its list.

In addition to teaching, university professors advise students and conduct research in their fields. While most positions require you to hold a Ph.D., a graduate degree might be sufficient for community colleges, according to the BLS.

#### 5. Statistician

Median Salary: \$92,270

If you're good with numbers, you might want to consider a career as a statistician. These individuals collect data to help solve problems in a variety of industries and generally work full time. They could need to work overtime to meet a deadline or fill a last-minute request for information.

Job growth for this profession is currently high, as an increasing number of businesses are using statistical analysis to make decisions, according to the BLS. Most opportunities require candidates to hold master's degrees in statistics, mathematics or similar fields.

#### 9. Mathematician

Median Salary: \$110,860

Mathematicians utilize techniques to solve problems in business, engineering and other fields. U.S. News ranked mathematician as the sixth-best job in business in 2021 and noted that mathematicians enjoy a variety of professional opportunities.

To qualify for a mathematics position, you'll need at least a bachelor's degree in math. Some positions require further education.

#### 10. Actuary

Median Salary: \$111,030

An actuary analyzes the financial costs of risks taken by businesses and clients. However, pursuing a career as an actuary involves little risk and plenty of rewards. South Dakota State University touts the profession for its "high pay, low stress, good job security" and contribution in solving important problems.

Actuaries commonly hold bachelor's degrees in math or related analytical fields. Additional certification is needed to achieve full professional status.

#### Top 10 Well Paid Jobs With Low Stress

Posted by Glassdoor Team Career Advice Experts Last Updated 20 August 2021

https://www.glassdoor.co.uk/blog/well-paid-jobs-low-stress/

#### 10 well paid jobs that are relatively low stress:

- 1.Statistician
- 2.Dental Hygienist
- 3.Librarian

#### 1. Statistician

#### Glassdoor Average Salary: £39,473

Statisticians use mathematical techniques to interpret data to draw parallels or to come to conclusions. Statisticians can work across various sectors, including public, private and academic. Freelance statisticians - those who are self-employed and work on a project basis, are in high demand.

Using logical thinking, combined with mathematical techniques to draw facts from raw data, statisticians can work solo or in a collaborative team. Having this option means, being a statistician is a relatively low-stress job.

An interest in mathematics and the ability to understand complex mathematical functions is important. When hiring, employers look for candidates who have a degree in maths or a related subject.

### We offer to B.Sc. the following programmes:

- Major in Statistics
- Major in Risk Management
- Major in Decision Analytics
- Minor in Statistics
- Minor in Risk Management
- Minor in Actuarial Studies
  - \* No quota on student no. of each option!

# Unique combination

Major in

Statistics or Risk Management or Decision Analytics

plus

#### Minor in **Actuarial Studies**

Combines broad exposure of

Statistics/Risk Management/Decision Analytics and professional knowledge in Actuarial Science

## Difference in focus between the 3 majors

Decision Analytics –

heavier emphasis on

#### COMPUTER SCIENCE + MATHEMATICS

Risk Management -

courses focus primarily on business-related topics: e.g. investment, insurance, finance, banking, etc.

Statistics -

courses cover wide range of topics with emphasis on "METHODS", their applications, and underlying theory.

#### A few practical reasons for majoring in

# Statistics / Risk Management / Decision Analytics

- Flexibility of the programme enables you to tailor-make your course of study.
- Develop your interest at your own pace.
- Pre-mature commitment not required.

# Mathematical background adequate?

Students must have <u>level 2 or above</u> in

HKDSE Extended Module 1 or 2 of Mathematics or equivalent

Otherwise, strongly advised to take

MATH1011 University Mathematics I

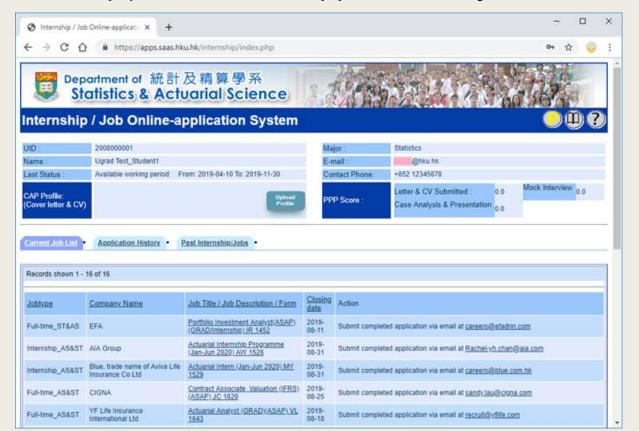

in Semester 1.

# What do we need from your Mathematics?

- Set notation and theory
- Functions (*incl.* limits, continuity)
- Sequences, series
- Basic calculus (incl. partial differentiation, double integration)
- Vectors, matrices (basic operations)

## Support from University and Department

- HKU: Centre of Development and Resources for Students
  - NETmatch, NETjobs, JIJIS (Joint Institutions Job Info. System)
- Department: Internship / Job Online Application System

# Career Development Training

- Summer IT course:
  - Essential IT skills (certificate course)
- Career Advising Programme (CAP) to prepare students for:
  - internships and job opportunities
  - advancing resume and interview skills

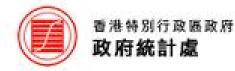

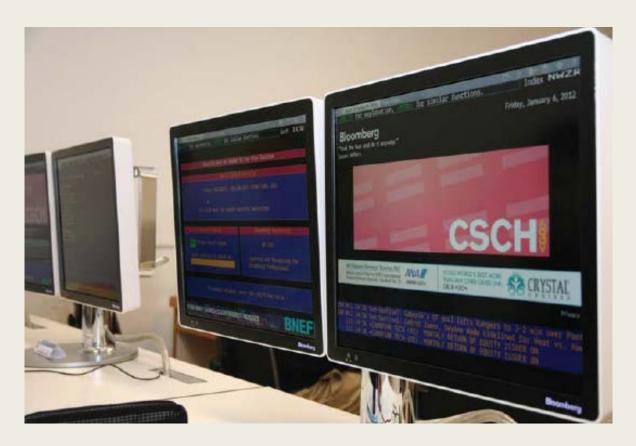

# Computing facilities

- two statistical computer laboratories
- up-to-date software for teaching, learning, research

### Besides career...

- Opportunity for further studies
  - Recently our graduates had pursued Masters and PhD studies in universities including Harvard, UC Berkeley, Yale, Stanford, Cambridge
- Scholarships/Awards
- Other learning opportunities

(e.g. overseas exchange, mentorship, internship, research projects)

### A reminder

Admissions requirement same as

6901 Bachelor of Science

- All students need to study two math courses in junior years
- Decision Analytics students need to study two computer science courses in junior years
- Students without M1/M2 are advised to take an extra math course to get better prepared
